

CALCIUM DDP[®]

PRODUCT DESCRIPTION

Wolf Trax™ Calcium DDP combines three forms of Calcium into a Dry Dispersible Powder, or DDP, with a proprietary adjuvant package to achieve synergy with a carrier such as fertilizer for improved plant uptake. Wolf Trax Calcium is delivered along with every granule, providing more feeding sites in closer proximity to plant roots for earlier uptake.

Guaranteed Analysis	
Calcium (Ca) 5.00% Water Soluble	27.00%

Derived from: Calcium Nitrate, Calcium Sulfate and Calcium Carbonate

Product Specifications		
Appearance	Color	Carrier Load (w/w)
Powder	Off White	0.80%

Typical Carriers: 15-15-15, DAP, MAP, MKP, MOP, SOP, UREA and others

Fertilizer Amount	Wolf Trax Calcium DDP (max)	Elemental Ca
1 Ton (2,000 lbs.)	16 lbs.	4.32 lbs.

KEY BENEFITS

- Adheres to carriers with EvenCoat® Technology, through the combination of electrostatic interaction and the aid of a proprietary adjuvant blend
- Extends window of availability by combining three sources of Calcium
- Increases root absorption of non-soluble Calcium by milling which multiplies the reactive surface area
- Extends the zone of Calcium availability through the combination of soluble and non-soluble forms
- Increases the number of interception points for roots to access bioavailable Calcium early in the growing season
- Provides flexibility in storage, transport and blending
