KEY BENEFITS

- Adheres to carriers with EvenCoat® Technology, through the combination of electrostatic interaction and the aid of a proprietary adjuvant blend
- Extends window of availability by combining two sources of Copper
- Increases root absorption of non-soluble Copper by milling which multiplies the reactive surface area
- Extends the zone of Copper availability through the combination of soluble and non-soluble forms
- Increases the number of interception points for roots to access bioavailable Copper early in the growing season
- Provides flexibility in storage, transport and blending
