

MANGANESE DDP[®]

PRODUCT DESCRIPTION

Wolf Trax™ Manganese DDP combines three forms of Manganese into a Dry Dispersible Powder, or DDP, with a proprietary adjuvant package to achieve synergy with a carrier for improved plant uptake. Wolf Trax Manganese is delivered along with every granule and prill, providing more feeding sites in closer proximity to plant roots for earlier uptake.

Guaranteed Analysis	
Manganese (Mn) 20.00% Water Soluble	33.00%

Derived from: Manganese Oxide, Manganese Sulfate and Manganese Chloride

Product Specifications		
Appearance	Color	Carrier Load (w/w)
Powder	Light Pink	0.80%

Typical Carriers: 15-15-15, DAP, MAP, MKP, MOP, SOP, UREA and others

Fertilizer Amount	Wolf Trax Manganese DDP (max)	Elemental Mn
1 Ton (2,000 lbs.)	16 lbs.	5.28 lbs.

KEY BENEFITS

- Adheres to carriers with EvenCoat® Technology, through the combination of electrostatic interaction and the aid of a proprietary adjuvant blend
- Extends window of availability by combining three sources of Manganese
- Increases root absorption of non-soluble Manganese by milling which multiplies the reactive surface area
- Extends the zone of Manganese availability through the use of combination of soluble and non-soluble forms
- Increases the number of interception points for roots to access bioavailable Manganese early in the growing season
- Provides flexibility in storage, transport and blending
