

WOLF TRAX 18.5% BORON DDP™

Guaranteed Analysis:

Boron (B) 18.5%

Dry Dispersible Powder formulated from boric acid, sodium borate and potassium tetraborate tetrahydrate.

Contains 3.7 lbs boron per 20 lb package. Contains 1.65 kg boron per 9.07 kg package. F002162

For the correction of boron deficiencies in crops WARNING: Over application of boron can result in phytotoxicity to crops. This fertilizer is to be used only on soil which responds to Boron.

KEEP OUT OF REACH OF CHILDREN. WEAR GOGGLES, GLOVES AND DUST MASK WHEN HANDLING. Use only outdoors or in a well-ventilated area. Do not eat, drink or smoke when using this product. Avoid breathing dust or prolonged contact with skin or eyes. Wash thoroughly after handling. Safety data sheet available. If swallowed: Call a poison center/doctor if you feel unwell. Rinse mouth. If on skin: Wash with plenty of water. Take off immediately all contaminated clothing and wash it before reuse. If skin irritation occurs: Get medical advice/attention. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. If inhaled: Remove person to fresh air and keep comfortable for breathing. Call a poison center/doctor if you feel unwell. PRECAUTIONS. Always read and follow labelled directions for application. Over application can result in phytotoxicity to crops. STORAGE AND DISPOSAL. Store in a tightly closed container, in a cool dry well-ventilated facility with no access to the general public. Do not store near feed, foodstuffs or in proximity to water bodies. If spills occur, clean up by sweeping up. Dispose of wastes or containers at an approved waste disposal facility. Dispose of containers by thoroughly emptying powder into tank and disposing of packaging in a sanitary landfill or at a waste disposal facility as recommended by state or local authorities. This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200. Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.htm>. WARRANTY DISCLAIMER. The seller shall not be liable for special, incidental or consequential damages or for damages in the form of penalties. The seller makes no other claims to the buyer for damages arising out of misuse of the product or the failure to follow label instructions. The goods sold to you are subject only to the guarantee specified on the label. The seller makes no other claims to the buyer either expressed or implied regarding the product sold with respect to the fitness of the product for a particular purpose. Ineffectiveness or unintended consequences may result as a consequence of manner of use of the product, which is beyond the control of the seller. In no case will the seller be held liable for damages arising as a result of mishandling of the product. The buyer assumes all such risks. The user prior to application must test compatibility of the product with other chemicals and the seller does not warrant that the product is compatible with all chemicals under all conditions.

DIRECTIONS FOR USE
Coating on Fertilizer Blends - This product is used as a coating on all dry fertilizer blends. Application rates and timings should be based on soil and/or tissue tests, as well as recommendations from a professional agricultural consultant. Retention levels of Wolf Trax Nutrients on dry fertilizer blends will vary. Factors affecting the retention level include the quality of the dry fertilizer, the level of dust within the dry fertilizer and the presence of liquid additives. As a general guideline, the retention rates of Wolf Trax Nutrients on many common dry fertilizer blends range from 0.3 to 1.0% by weight. Liquid additives may increase the retention of Wolf Trax Nutrients. To determine the coating capacity of Wolf Trax Nutrients on your dry fertilizer blends, always use a blend test and consult a Compass Minerals representative.

Mixing instructions for foliar applications - Fill tank to 1/3 full, start agitation and pour required amount into tank. Use sufficient water to ensure thorough coverage. If mixing with a crop protection product, always add the micronutrient to the spray solution before adding the crop protection product. Prior to spraying, conduct a compatibility test by adding the products to water in a quart jar to ensure that the products will remain in solution. It is also recommended to use 50 mesh or coarser screens on all nozzles.

Foliar application rates and timing – The following rates are based on correcting deficiencies seen in extensive field-testing. Individual rate recommendations may be obtained using a tissue test. CAUTION - The use of this product on crops other than those listed may result in serious injury to the crop.

Crop	Foliar Rate	Foliar Timing
Apples, apricots, avocados, pistachios, pears, almonds, citrus, cherries, plums, strawberries, cane berries, grapes, melons, walnuts, peaches	Apply 4 oz/acre (300 grams/ha)	Apply pre-bloom or post harvest while the leaves are green and still actively growing. If necessary to correct deficiency, this treatment may be repeated up to three times per season.
Alfalfa, canola, cotton, flax, clover, corn, hops, turfgrass, peanuts, soybeans, sugarcane, sunflowers, cereals, sugar beets	Apply 4 oz/acre (300 grams/ha)	Apply before bloom or heading. If necessary to correct deficiency, this treatment may be repeated up to three times per season.
Beets, carrots, cucumbers, lettuce, onions, turnips, radishes, spinach, broccoli, cabbage, celery, cauliflower, brussel sprouts, peppers, tomatoes, potatoes, lentils, peas, beans	Apply 4 oz/acre (300 grams/ha)	Apply 1 to 4 weeks after emergence. Normally a repeated treatment (3 times in a season) is necessary to correct deficiency.

Danger H315: Causes skin irritation. H319: Causes serious eye irritation. H360: May damage fertility or the unborn child.

65% of the mixture consists of component(s) of unknown acute inhalation toxicity.
